

Adeel Ahmad

Information Technology Student — Networking, Cloud & AI

Madinah, Saudi Arabia | (+966) 531692753 | adeelahmada485@gmail.com
github.com/adeliusa486 | linkedin.com/in/adeel-ahmad-5a041b237

SUMMARY

Final-year Information Technology undergraduate at the Islamic University of Madinah with hands-on experience in networking, AWS cloud computing, and applied machine learning. Co-author of an IEEE conference paper and builder of full systems from hardware to dashboard.

EDUCATION

Bachelor of Information Technology, Islamic University of Madinah 2023 – Present
GPA: 3.99 / 5.00

Higher Secondary Education, Punjab College of Commerce 2020 (92%)

Secondary Education, Govt. High School, Qila Didar Singh, Gujranwala 2017 (90%)

TECHNICAL SKILLS

Programming: Python, Java, SQL

AI & Machine Learning: Machine Learning, PyTorch, NumPy, OpenCV

Networking: CCNA (in progress), Routing & Switching, OSPF, RIP, EIGRP, VLANs, ACLs, Wireshark, Packet Tracer

Cloud & Systems: AWS, Linux

Tools: Git, Raspberry Pi, Flutter, WordPress, Microsoft Office

EXPERIENCE

Intern, Asaqefah Business Development — Madinah Jun 2026 – Present

- Built an MVP of a smart crowd-management system for Al-Masjid an-Nabawi: an AWS-powered, multi-lingual visitor app with an operations dashboard.
- Owned the full stack across real-time navigation, crowd analysis, and cloud architecture.

Developer, Team VisionBridge AI — King Salman Center AI Hackathon 2026

- Built an offline Raspberry Pi smart cane using AI object detection and a laser sensor for visually impaired users; selected into the hackathon acceleration phase.

PROJECTS

Smart Cane for the Visually Impaired (IoT): real-time object detection (SSD MobileNet V1, OpenCV) on a Raspberry Pi with spoken English alerts and vibration feedback.

XAI-SDN — Explainable ML for DDoS Detection in SDN: built a Random Forest classifier with SHAP explanations on the CIC-DDoS2019 dataset (3.59M flows), reaching 99.99% accuracy at sub-millisecond inference; served via a FastAPI API and Streamlit dashboard. github.com/adeliusa486/XAI-SDN

Network Topology Design & Troubleshooting (CCNA): configured OSPF/RIP/EIGRP, VLANs, ACLs, and port security in Packet Tracer; diagnosed faults with Wireshark.

PUBLICATIONS

Co-author, “Privacy Leakage in Federated Learning: Gradient-Based Client Identity Inference and Defense Analysis for Secure Vehicular Networks,” accepted at the IEEE 104th Vehicular Technology Conference (VTC2026-Fall).

ACTIVITIES & HONOURS

- Saudi Government-funded scholarship recipient, Islamic University of Madinah (Mar 2023), for academic excellence.
- AWS Cloud Practitioner; CCNA (in progress), Cisco Networking Academy; TryHackMe (Sec 0).

LANGUAGES

Urdu (Native), Punjabi (Native), English (B2), Arabic (Beginner)
